

***“Care home and its boss fined £337k after 100-year-old died falling from a hoist”***

(The Telegraph 27.3.15)

‘health and safety breaches for failing to **train** the staff properly’

***Many institutions have been fined for unsafe moving & handling practices.***

***Make sure your organisation isn’t next.***

***Train your staff, improve safety and avoid fines.***

## Safe Use of Hoists

Hoisting is an everyday activity in many care settings. Shouldn’t you be sure your organisation is getting it right?

Our module is designed to give staff the best grounding possible to ensure safe and appropriate hoisting.

***“BUPA Care Homes fined £400,000 over bedrail failures ”***

(AT Today 6.06.16)

‘failed to **train** staff in the assessment of and safe use of bedrails’

## Safe Use of Bedrails

Bedrails are used to help reduce injury but there are many cases when our industry has got it wrong.

Our module is designed to give staff the best grounding possible to ensure safe and appropriate use of bedrails and help spot hazards early on.

### *Did you know?*

You can meet the requirements of risk assessment with one carer. Including: Hoisting, Use of the standing hoist and Personal care. Learn more on our training module.

## Single Handed Care

Care provision is often undertaken by two carers leading to logistical difficulties, spiralling costs and a lack of consistency for the client.

Single handed care aims to support staff to provide high standards of care but with one worker instead of two. This is done through a combination of training, robust risk assessment and equipment provision.

HME operate a one trainer to eight delegates ratio for all courses.

HME deliver training tailored to your specific needs.

Please call us at **01623 749727** to discuss your requirements.

starting from

**£25** ex. VAT  
per person

Duration

3 hours

Location

On site or HME/  
Prism venues
