

Through Floor Lifts

Prism Medical UK are proud to work in partnership with specialist Through Floor Lift manufacturers, Terry Mobility Solutions and Wessex Medical Equipment.

Through Floor Lifts enable wheelchair users to travel between floors in their wheelchair, avoiding the need to transfer from the wheelchair and onto, for example, a stairlift.

An Introduction to Through Floor Lifts

Regain the freedom of your home by being able to travel between floors smoothly, quietly and safely either seated or in one of our wheelchair carrying models.

The installation of a through floor lift is a far less complicated operation than you might think. Following the initial survey and the subsequent decision to proceed, our experienced team will carry out all necessary preparatory work and install the lift in four to five days providing this is one continuous process.

Lower room when lift upstairs

Upper room when lift downstairs

Entering the lift upstairs

Moving downstairs

Lift approaching lower floor

Exiting the lift downstairs

Key Features

- Powered or manual door options
- Up to 250kg (39 stone) maximum load capacity
- Smooth and quiet operation
- Inherent safety system to guard against free fall of car
- Simple and unintrusive
- Radio wireless controls in car and at both floors which enable travel, stop and door open/close commands
- Adjustable lift car controls can be positioned on the left or right of the car to suit users needs
- No unsightly surface trunking
- A range of optional accessories and customisation
